Resolution on International coral Reef Action Network (ICRAN)

Adopted during the ICRI Coordination and Planning Committee (CPC) Meeting
28 and 29 October 2000, Bali (Indonesia)

ICRI CPC

Recalling the resolution of May 2000 which called upon International Coral Reef Initiative (ICRI) partners and the global community to work together in the ongoing development, implementation and support of the ICRAN Program;

Endorses the ICRAN program and its efforts to secure funding from both the United Nations Foundation (UNF) and other sources, including the private sector, for its important and coherent action-oriented programme aimed at reversing the decline of coral reefs;

Endorses the proposed arrangements to provide governance, including a steering committee with an elected chair and a management board for an international coral reef fund for implementation of the ICRAN Strategic Plan;

Requests the ICRI partners developing ICRAN to find means to achieve the non government organization and private sector representation provided in the management structure of ICRAN.
