

Report of the *Ad Hoc* on the Call to Action

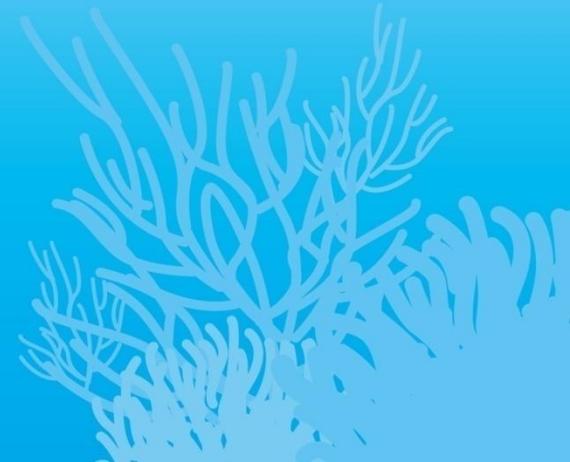

Task

To work on a renewed call to action and to **integrate new global issues and threats** to coral reefs and related ecosystems, the advancements and continuing challenges in science and management, and the review process.

ICRI GM 25 (November 2010)

A proposal of the update of the “*Call to Action*” was presented by at the ICRI Meeting in November 2010.

What are the major changes in the new « Call to Action »?

- Update and introduce figures to support the arguments on the significance of the coral reefs.
- Recognize the climate change impact
- Emphasize the need for better water quality
- Integrate/ take into account traditional /local management
- Recall the need to improve the access to financial support

ICRI members were asked to provide comments on this draft proposal, in order to release this document in March 2011.

Very few comments were received by the ICRI Secretariat.
